

1) Reflect on the decisions you made regarding design elements, colors, icons, and the overall representation of yourself through the player card

Ans:- The adoption of a warm, strong colour scheme with reds and yellows contributed to the lively ambiance, which reflects my spirit of adventure and energy. The cinema background was deliberately chosen to provide a hint of intrigue without drawing attention away from the text. It connects to my passion for adventure and new experiences as well.

The use of emoticons and icons was a creative way to give the card some personality and a less professional vibe. For example, my impulsive nature is reflected in the meme about buying flights. The runner and soccer ball emojis were selected to represent my hobbies and active lifestyle.

2) Discuss any challenges you faced during the design process and how you overcame them.

Ans:- Trying to fit everything on the card without packing it in too tightly was one of the challenges I faced. I was forced to decide what information was most important to include and what could wait, which made the design more balanced and points of interest. Another challenge was getting familiar with Figma as a beginner. It took some time to understand how to work with layers, adjust text, and align elements perfectly.

3) Consider how this assignment has helped you understand the basics of Figma and how you plan to utilize this knowledge in future projects.

Ans:- I was able to understand the fundamentals of Figma, including how to create shapes, modify layers, and align objects. I intend to use similar strategies in upcoming projects to produce more intricate and sophisticated designs.
